

AWS Application Modernization Assessment (AMA)

Portfolio discovery & directional assessment phase of the AWS Microsoft Modernization Program (MMP)

Portfolio analysis

Source code + database
+ infrastructure

Modernization Scoring

ROI analysis, criticality, ease of
modernization

Licensing impact

TCO comparison of current state
to license-free infrastructure

\$0
customer cost

The AMA provides fast guidance on *what* workloads to modernize

Align

Select portfolio to assess
and modernization goals

Collect

Run ISV tooling collection
for apps + databases

Analyze

Source code, db schemas,
infrastructure, licenses

Validate

Interviews with
application owners

Deliver

Assessment results with
proposed next steps

What Customers Get

- ✓ **Low-touch Assessment of 2 – 10 Apps**
Leverages AMA-approved ISV tools + Evolve's tools
- ✓ **Portfolio Source Code Scan**
Identifies code solution/project structure,
language/framework usage, and insights
- ✓ **Database Modernization Analysis**
Data architecture assessment and modernization
options including relative level-of-effort
- ✓ **Modernization Scoring**
ROI analysis, criticality assessment and ease-of-
modernization scoring allow directional ranking
- ✓ **Licensing Assessment**
Current licensed-tech costs and estimated savings
by moving to license-free / cloud-native

Why Choose Evolve

Accelerated timeline and light touch

Evolve leverages AWS ISV tools to complete an
AMA in weeks without large staff commitment

No Customer Risk

Fully-funded portfolio assessment at no cost to
customers

Proven Methodology

Aligned to AWS Modernization Pathway:
AMA → MMP MVA → MMP/MAP Project

Actionable Results

Clear candidates identified for deep-dive MVA
analysis and applicable funding program(s)
